I just tested positive for COVID-19, are there treatments?
There are IV medications and oral pills that can be used to treat COVID-19. Talk with a health care provider as soon as possible to see if you are eligible for one of these treatments – you will need a prescription.

You can also find a Test to Treat site[1] and get treatment where you get tested.

Have your provider send the prescription to any pharmacy listed on the **treatment locator**[2] or call **1-800-338-3831.**
