FOR IMMEDIATE RELEASE  
June 3, 2022

## **LOGAN COUNTY MOVES TO HIGH COVID-19 TRANSMISSION LEVEL**

The Logan County Department of Public Health (LCDPH) is reporting an increase in cases of COVID-19 and numbers are also on the rise nationwide as new COVID-19 variants emerge. Currently, Logan County is classified as one of 19 Illinois counties rated at a high community transmission level based on the Centers for Disease Control and Prevention (CDC) data. This classification rating is based on CDC metrics as the area is seeing a rise in the number of cases, hospital admissions and bed occupancy. To minimize transmission levels, the extra steps citizens should consider taking are as follows:

- Eligible candidates should consider getting vaccinated (including boosted) to reduce the risk of becoming seriously ill or hospitalized from COVID-19. If already vaccinated, stay up to date with boosters. Vaccines (including boosters) are available (no appointment needed) at LCDPH on Tuesday (Pfizer), Wednesday (Johnson & Johnson) and Thursday (Moderna).
- Wear a well-fitting mask indoors in public, regardless of vaccine status (including K-12 schools and other community settings).
- Stay home if you are sick. COVID-19 has many symptoms and even if you think it could be allergies, please stay home and test, just to be safe.
- Maintain improved ventilation throughout indoor spaces when possible.

- Follow CDC isolation and quarantine recommendations which includes getting tested if you are exposed to COVID-19 or have symptoms.
- If you are immunocompromised and at high risk, wear a mask or respirator which provides greater protection, consider avoiding non-essential indoor public activities, have a plan for rapid testing (e.g., home test kit) and talk to your healthcare provider about whether you need to take other precautions. If you are immunocompromised and test positive, talk to your medical provider about whether you are a good candidate for treatments such as oral antivirals and monoclonal antibodies.
- If you have a household or social contact with someone who is at high risk for severe disease, consider self-testing to detect infection before contact. In addition, consider wearing a mask indoors when with the high-risk contact.

By proactively considering these steps, the threat of COVID-19 can be further minimized. For more recommendations on how to protect yourself and prevent further spread of COVID-19, you can visit the CDC website at [www.cdc.gov](http://www.cdc.gov) or the Illinois Department of Public Health at [www.dph.illinois.gov](http://www.dph.illinois.gov). For local information regarding immunization availability and testing, you can visit the Logan County Department of Public Health website at [WWW.LCDPH.ORG](http://WWW.LCDPH.ORG) or call them at 217-735-2317.
